

# planswift® is the Fastest and Easiest Software for completing construction takeoffs and estimates

Completing construction material takeoffs has never been easier. PlanSwift, the Industry leader in digital plan software now offers more time saving features than ever.

- Increase accuracy and greatly reduce time spent performing takeoff and estimating activities.
- Calculate arcs and other irregular shaped lines and area with ease and accuracy.
- Accuracy on your takeoffs will be increased, especially on 1/40 – 1/100 scaled drawings.
- Send all takeoff quantities and estimating data to MS Excel with a click of a button.
- PlanSwift offers a robust estimating system built-in for calculating your quantities through your finished job totals.

- E-mail feature makes it easy to send finished plans to owners, G.C.'s or field personnel.
- Reduce printing expenses and eliminate wasted time obtaining CD's & drawings.
- PlanSwift operates with most file formats & drawings. (even Google Earth images).
- Easily create a plan schedule for large Sealcoating projects. (color coded with dates)
- Road cross-sections can be calculated in seconds.
- Plug-ins available for calculating cut & fill quantities and offer assistance with estimating.
- Every estimator can learn how to use PlanSwift with minimal training.
